

white noise

IF 2005 - 6,22 min b/w Videoshortfilm

Awaken throu Noise a person finds him/herself in the outside. Here she/he is confronted with Traffic, Architecture, movement, noise and silence including facing different Figures. The encounter intensifies at the end and it comes to a peak.

A easy Storyframe takes the observer to different Places, states of Emotions and strange Figurations. No word is said, just noise guides the film.

A play with feelings of axiety, Dreamsequences, current state of fear, paranoia, deafening.
